GUBERNA
INSTITUUT VOOR BESTUURDERS
INSTITUT DES ADMINISTRATEURS

Based on our conviction that good governance leads to better organisations and that better organisations contribute towards a better world, we set up partnerships with organisations who share our conviction and who want to shape good governance with us.

Within the GUBERNA Research Partnership, we research together governance practices or we set up a governance-related research project on an overarching theme. As a GUBERNA Research Partner, you benefit from exclusivity within your sector within the scope of the partnership.

Your most important benefits as a GUBERNA Research Partner

- During the entire duration of the contract, your Research Partnership with GUBERNA is exclusive and privileged in relation to other organisations that operate in your sector. Cooperation with any possible additional Research Partner within the framework of the specific governance-related research will be subjected to your prior written approval.
- We discuss the positioning, further development and the valorisation of the project's results at regular times.
- Your organisation enjoys prominent visibility in all communications about the research project and related publications, press conferences and events.

In addition to the main project, your organisation enjoys numerous benefits
